

Ashwin Parameswaran

(214) 734-9442 • ashwinrp03@gmail.com • Irving, TX 75063

OBJECTIVE

An enthusiastic and driven student eager to pursue a career in data, software, and AI/ML in automotive applications. Skilled at analytical/quantitative problem solving, written/verbal communications, and organizational ability.

EDUCATION

Texas A&M University, College Station, TX – *College of Engineering, Class of '26*

Junior Honors Student, Pursuing BS in Computer Science w/ Minors in Electrical Engineering & Mathematics

GPA: 3.761

Financed 100% of college education through merit scholarship awards.

Uplift North Hills Preparatory, Irving, TX – *Class of '22*

International Baccalaureate Diploma

Weighted GPA: 4.61 - Ranked 3rd of Graduating Class

TECHNICAL SKILLS

- **Languages:** C++, Python, Java, Scheme, Assembly, Ladder Logic
- **Coursework:** Software Engineering, Object Oriented Programming, Data Structures & Algorithms, Linear Algebra, Discrete Math, Computer Organization
- **Other Skills:** Machine/Deep Learning, Computer Vision, Transformers/NLP, ICS/SCADA Operational Technology, Embedded Software

EXPERIENCE

Texas A&M Sketch Recognition Lab – *Research Project:*

June 2024 - Present

- Collaborate with PhD student to test & evaluate modern computer vision models
- Worked with multiscale edge guided attention to perform medical imaging

Texas A&M Cybersecurity Lab – *ICS Engineer*

Nov 2023 - Present

- Design ICS and SCADA systems to model industrial processes through project-based research.
- Researched and augmented industrial automation via OT, IT, ladder logic, and PLC's.
- Took part in development of ML models for intrusion/anomaly detection.

ACTIVITIES

Texas A&M Solar Car Racing Team

Oct 2022 - Present

- Programmed/tested/verified electrical and control systems for endurance racing
- Finished 7th of 42 teams in the American Solar Challenge

TAMU Datathon

October 2023

- Developed model via PyTorch to make predictions for social media marketing startup
- Familiarized with modern AI concepts such as GPTs, tokenization, self-attention, etc.

Aggie Data Science

Sept 2022 - Present

- Learned fundamentals of Data Science, AI/ML, and LLMs
- Worked in Agile team environment to develop telemetry system for TAMU Formula Electric Team

VICEROY Scholar

- Virtual Institutes for Cyber and Electromagnetic Spectrum Research and Employ
- Received stipends for research & coursework in data science, cryptography, and cybersecurity

HONORS

- Craig & Galen Brown Foundation Scholar
- President's Endowed Scholar
- Texas A&M University & Engineering Honors
